multiSub Choice Horizontal Electrophoresis Bundle

Wide-format system with 2-3 times the sample capacity as the MSMIDI and MSMINI units (192 samples).

A comprehensive selection of combs provides full flexibility for preparatory and screening techniques. Suitable for cloning and mini-prep analysis. Ideal for restriction fragment analysis, sample prep or checking.

Bundle: multiSub Choice + Power supply CS-300V

OmniPAGE Mini Wide Vertical Electrophoresis System

The OmniPAGE Mini Wide vertical gel unit with an active gel width of 18cm effectively allows double the number of samples to be resolved as the OmniPAGE Mini unit. This allows consistency of sample comparison on a single gel and is designed for those with greater than 20 samples to compare and resolve.

Gel Documentation Bundle

The GDH-BASIC is a simple to use gel documentation hood for use with a mobile phone. Simply place the hood over your light source and use your phone to zoom in and take an image.

The safeVIEW-MINI LED illuminator is designed for viewing stained gels on the laboratory bench, or within gel documentation systems. Lighting from the LED source inside the instrument produces blue light with a narrow emission peak centered at approximately 470 nm, which is more effective for the excitation of most nucleic acid and protein stains.

Bundle: GDH-BASIC + safeView MINI
