Benchmark Scientific

Benchmark Scientific, Inc. is pleased to present our 2019-2020 research products catalog. Since our inception, we have been providing research laboratories with innovative, cost effective products and solutions designed to improve laboratory efficiency, safety and results.

Our emphasis on next generation technology, quality and value has served our customers and our company well. As a result of recent growth, we have expanded our facilities, our staff and our product lines to serve you better. We welcome your questions, suggestions and comments.

my FUGE™ Mini

+ **Clik-n-Lok™ instant rotor attachment**
+ **Eight position microtube rotor**
+ **Storage compartment for PCR rotor and 0.5ml adapters**
+ **Decelerates in just 1 second**
+ **Rotor for 4 PCR strips**

Storage compartment

Includes both rotors

The myFuge™ Mini Microcentrifuge is a personal centrifuge that virtually fits in the palm of your hand. Ideal for quick spin downs of microtubes and PCR tubes, the myFuge is extremely easy to use. Simply close the lid and the rotor instantly reaches 6,000 rpm. Open the lid, and the improved braking system quickly and smoothly decelerates the rotor to a complete stop in just one second.

An eight-position microtube rotor is included and comes installed. Also included is a second rotor with increased capacity for four 0.2ml PCR strips (or 32 x 0.2ml tubes) which is stored in a convenient compartment on the bottom of the centrifuge. This compartment is also used for securing the included tube adapters for 0.5ml tubes.

A new *Clik-n-Lok™* rotor attachment system eliminates the requirement for set screws and tools during rotor exchange. Simply remove and attach rotors by hand, pulling or pressing the rotor onto the motor shaft.

Available in 5 colors

Technical Data:

Speed:	**6,000 rpm / 2,000 xg**
Capacity:	**8 x 1.5/2.0ml tubes** **32 x 0.2ml PCR tubes** **4 x PCR strips (8 x 0.2ml)**
Dimensions: (W x D x H)	**5.7 x 6.9 x 4.5 in.** **14.5 x 17.8 x 11.4 cm**
Weight:	**2.2 lbs. / 1 kg**
Electrical:	**Universal Voltage** **100-240V, 50-60 Hz, 50W**
Warranty:	**2 Year**

 All models include microtube rotor, PCR rotor and 0.5ml adapters.

myFUGE™ 12

- **COMBI-Rotor™ for tubes and strips**
- **Twice the capacity of most mini centrifuges**
- **Near silent operation**
- **Starts & stops with closing/opening of the lid**

Unique COMBI-Rotor

Compact, low profile design

Unlike traditional mini centrifuges, the new myFuge™ 12 eliminates the need to change rotors when switching between microtubes and PCR strips. The included, unique COMBI-Rotor™ is all that is required for running 12 microtubes and/or 4 (eight position) PCR strips.

With a fixed speed that produces 2,000 xg, this centrifuge is perfect for quick spin downs. vSimply close the lid and the unit accelerates to 5,500 rpm. Open the lid, and the rotor quickly decelerates for removal of samples.

At just 5.5 inches wide and less than 4.5 inches tall, the myFuge 12 truly is a personal centrifuge with unmatched capacity and flexibiilty.

Technical Data:

Speed:	**5,500 rpm / 2,000 xg**
Capacity:	**12 x 1.5/2.0ml tubes** **32 x 0.2ml PCR tubes** **4 x PCR strips (8 x 0.2ml)**
Dimensions: (W x D x H)	**5.5 x 7.9 x 4.4 in.** **14 x 20 x 11.2 cm**
Weight:	**2.2 lbs. / 1 kg**
Electrical:	**Universal Voltage** **100-240V, 50-60 Hz, 50W**
Warranty:	**2 Year**

*Includes US plug. For EU plug, please add (-E).

StripSpin™ 12   Microcentrifuge

For labs using 12 position PCR strips

Rotor holds 12 position PCR strips

Holds up to 4 x PCR strips
or 48 x 0.2ml tubes

For technical data, please see model C1012

Ordering Information:

Item No.	Description:
C1248*	StripSpin 12 Mini Microcentrifuge with 4 x 12 strip rotor
C1008-ROT	Optional rotor, 8 x 1.5/2.0ml
C1008-A5-8	Optional adapter pack for C1008-ROT, 0.5ml, 8/pk.

*Includes US plug. For EU plug, please add (-E).

myFuge™ 5 Microcentrifuge

2000 RCF

Rotor for 5ml microtubes

For quick spin downs of 5ml centrifuge tubes

Includes adapters for 5ml blood tubes

Starts and stops with closing/opening of the lid

Optional adapters for centrifuging cryovials

The myFuge™ 5 microcentrifuge includes a four position rotor for compatibilty with a variety of 5ml test tubes, including 5ml snap cap centrifuge tubes. In addition, this combination rotor has four additional slots for centrifuging standard microtubes (1.5/2.0ml). Simply close the lid and the centrifuge quickly accelerates to the fixed speed of 5,500 rpm. Open the lid, and the rotor decelerates to a stop for removing samples.

The 5ml rotor positions accept 5ml centrifuge tubes directly, while 5ml blood and culture tubes (12x75mm) are accepted with the included adapters. The microtube positions are designed to accept 0.5 and 0.2ml tubes with the use of optional adapters.

Technical Data:

Speed:	5,500 rpm / 2,000 xg
Capacity:	4 x 5ml tubes & 4 x 1.5/2.0ml
Dimensions: (W x D x H)	5.5 x 7.9 x 5.5 in. 14 x 20 x 14cm
Weight:	2.2 lbs. / 1 kg
Electrical:	Universal Voltage 100-240V, 50-60 Hz, 50W
Warranty:	2 Year

C1008-A2-6	Adapter pack, 0.2ml, 6/pk.

*Includes US plug. For EU plug, please add (-E).

PlateFuge™ Microplate Centrifuge

PLATEFUGE™
MICROPLATE MICROCENTRIFUGE

+ **Quickly spins down droplets in PCR plates**

+ **Unique, patented rotor design prevents sample spillage**

+ **Accepts all popular PCR plates**
   (skirted, semi and non) and most microtiter plates

+ **Less than half the size of traditional centrifuges**

CE

Benchmark's PlateFuge™ is the first "mini" sized centrifuge with a swing out rotor for microplates. Centrifugation of plates before PCR ensures all reactants are in the bottom of the wells for optimized concentrations and improved yields.

In spite of its remarkably small footprint (9 x 10 in.), the PlateFuge™ includes a uniquely designed, patented swing out rotor capable of securing two microplates. The easily accessible rotor chamber includes two plate carriers that rest at a 75° angle. This allows plates to be inserted confidently without sealing tapes or caps. Upon closing the lid of the centrifuge, the rotor accelerates and the centrifugal force "swings" the plates into a vertical position. Any droplets on the walls of the plate, quickly concentrate into the well bottoms.

Before & after centrifugation (angled position)

During centrifugation (horizontal position)

With a g-force of 600 xg, most samples can be spun down in less than 20 seconds. To end a run, simply open the lid and the automatic, electronic brake brings the rotor to a quick, smooth stop in about 4 seconds. Plates can then be easily removed from the rotor.

Technical Data:

Speed:	2550 rpm / 600 xg
Capacity:	2 x 2 PCR plates* 2 x microtiter plates (up to 25mm) 24 x 0.2ml PCR strips
Deceleration:	4 seconds
Dimensions: (W x D x H)	9.2 x 10.2 x 7.75 in. 23 x 26 x 19.7 cm
Weight:	9 lbs. / 4.1 kg
Electrical:	115 or 230V, 50-60 Hz, 250W
Warranty:	2 Years

*When stacking skirted PCR plates, max. capacity is 4 plates.

Ordering Information:

Item No.	Description:
C2000*	PlateFuge Microplate Centrifuge with rotor and plate carriers
C2000-A02	Tube adapter, holds 96 x 0.2ml or 8 and 12 position PCR strips, 2/pk.
C2000-DWMP	Optional rotor with carriers for deep well plates up to 35mm tall (speed: 1500rpm)

*115V with US plug. For 230V (EU plug), please add (-E).

16,100 RCF

- **Less than 9 inches wide**
- **Large LCD with rcf conversion**
- **Whisper quiet operation**
- **Decelerates in just <u>10 seconds</u>**
- **12 tube capacity (1.5/2.0ml)**

Benchmark's MC-12 is the first and only compact microcentrifuge capable of achieving centrifugal speeds up to the critical threshold of 16,000 xg, often held as the standard for many molecular biology/DNA protocols. A brushless, maintenance free drive system makes it powerful, yet compact enough to allow each work station to be fully equipped with a personal centrifuge.

High speed range

Large LCD controls

The MC-12 defines a new class of microcentrifuge: compact, quick, powerful and affordable. All aspects of microcentrifuge performance were taken into consideration and no compromises were made. In addition to its unsurpassed speed, the MC-12 also delivers shortened acceleration/deceleration times, whisper quiet operation and a computer-designed airflow pattern to minimize sample temperature increases during longer runs at high speeds.

All operating parameters are set using a single, conveniently located control knob. The large, bright LCD provides a clear indication of time and rpm or g-force. A separate momentary spin button permits instant spin downs, without setting or disturbing any preset parameters. The aircraft grade aluminum rotor accepts 1.5 to 2.0ml tubes directly, as well as 0.5 and 0.2ml tubes with optional adapters. For applications requiring sub-ambient temperatures, the MC-12 is cold room safe.

Technical Data:

Speed Range:	**500 to15,500 rpm (up to16,100xg)**
Capacity:	**12 x 1.5/2.0ml**
Deceleration:	**10 seconds**
Acceleration:	**12 seconds**
Speed Increment:	**100 rpm or 100 rcf**
Timer:	**20 sec. to 99 min. / cont.**
Momentary:	**Yes**
Dimensions: (W x D x H)	**8.7 x 10.6 x 5.9 in. 22 x 27 x 15cm**
Weight:	**10.5 lbs / 4.8 kg**
Electrical:	**115 or 230V, 50-60 Hz, 100W**
Warranty:	**2 years**

MC-24 Touch™ **High Speed Microcentrifuge**

MC-24™ *Touch*
High Speed Microcentrifuge

- Full color touch screen
- mySpin™ 1 button program recall
- COMBI-Rotor™ accepts tubes and strips
- Compact design, 9 x 12 x 7.75 in.
- Unique air-flow system, keeps samples cool

Touch Control · **Quiet Operation** · **High Speed**

Unique COMBI-Rotor™
Accepts tubes and strips

Full-color Touch Screen

Benchmark's MC-24 Touch is the first microcentrifuge in its class with the convenience of touch pad control. In addition, this model comes complete with a unique COMBI-Rotor™ that accepts both standard microtubes and PCR strips, making this the ideal microcentrifuge for any microbiology laboratory.

The large, color touch screen shows actual speed (in rpm or rcf) along with set and remaining time. Up to 9 speed/time profiles can be stored in memory and the home screen displays a "mySpin" icon for instant recall of a designated favorite profile.

Supplied with Benchmark's unique COMBI-Rotor™, the MC-24 Touch will accept 24x1.5/2.0ml tubes and 2 strips of 0.2ml tubes (16x0.2ml) without requiring separate adapters. Samples are kept cool, even during extended runs at the maximum speed setting by a proprietary air flow system that moves air evenly and quietly throughout the chamber.

The MC-24 Touch is cold room safe and carries a 2 year warranty.

Technical Data:

Speed Range:	200 to 13,500 rpm (up to 16,800xg)
Capacity:	24 x 1.5/2.0ml 2 x PCR Strips (16 x 0.2ml)
Speed Increment:	100 rpm or 100 rcf
Timer:	20 sec. to 99 min. / cont.
Momentary:	Yes
Dimensions: (W x D x H)	9 x 12 x 7.75 in. 23 x 30.5 x 19.7cm
Weight:	14 lbs / 6.4 kg
Electrical:	115 or 230V, 50-60 Hz, 100W
Warranty:	2 years

LC-8™ Series Centrifuges

3,070 RCF

LC-8 Laboratory Centrifuges

- Digital speed control with rcf conversion
- Safety lid-lock prevents opening the lid until the rotor stops
- Unique air flow design limits increase in sample temperature
- Eight position rotor accepts tubes ranging from 5ml to 15ml
- Ideal for PPP and PRP blood separations

CE
| 15ml Conical Centrifuge Tubes | 15ml Blood Collection Tubes | 10ml Blood Collection Tubes | 5-7ml Blood Collection Tubes (requires adapter) |

Benchmark's LC-8 Series of laboratory centrifuges is uniquely designed to meet a wide range of applications in both the clinical and research laboratory. An eight position rotor is included and designed to directly accept 10ml and 15ml test-tubes (conical or round bottom), while optional adapters are also available for use with all popular sizes of blood collection and culture tubes. Unlike most compact centrifuges in this class, the rotor can be easily removed from the chamber for cleaning.

The back-lit, liquid crystal display provides full control over the set run time and rotational speed. The rotational speed can be set/viewed in rpm or rcf and acceleration/deceleration levels can be easily adjusted in the advanced settings mode.

To ensure safety, the digital microprocessor ensures that the lid has been closed and that the safety lid lock is engaged prior to starting a centrifugation cycle. In addition, an advanced imbalance detection system constantly monitors the balance and vibration, automatically bringing the rotor to a stop if an imbalance is detected.

Technical Data:

	LC-8	LC-8 Plus
Speed Range:	400 - 3,500rpm (1500xg)	400 - 5,000rpm (3070xg)

Z216-1220H

COMBI-Rotor™
24 x 1.5/2ml and 4 x PCR
Z216-2420S

Compact, quiet, and powerful are just a few of the features found on the Z216 Series Microcentrifuges. Add to this, the versatility of eight available rotor options, and the result is the ideal microcentrifuge for the modern molecular biology laboratory.

All common microtubes (0.2ml, 0.5ml, 1.5ml, 2.0ml) can be accepted as well as PCR strips, hematocrit tubes, and even 5.0ml centrifuge tubes. Advanced microprocessor controls allow for setting/displaying of the rotational speed in either rpm or rcf. In addition to retrieving saved programs, the easy to use front panel can adjust accel/decel rates, and change the end of run alarm tone.

Despite a remarkably small footprint, the Z216 series offers high output with a uniquely designed 44 x 1.5ml dual row rotor, nearly doubling the capacity when compared to traditional microcentrifuges. A unique COMBI-Rotor™ for 24 x 1.5/2.0ml and 4 x PCR strips is also available, featuring our new Quick-Seal™ biocontainment lid that opens and locks with only a quarter turn.

In the Z216-MK model, a powerful, compressor driven cooling system maintains temperatures as low as -20°C and is designed to reach 4°C (from room temperature) in less than 10 minutes.

Technical Data:

Speed Range:	**200 to 15,000 rpm (up to 21,631xg)**
Max. Capacity:	**44 x 1.5/2.0ml 4 x PCR Strips (32 x 0.2ml)**

Z446-750-A57	5/7ml	21	84

The Z446 Universal Centrifuge Series offers the highest capacity of any benchtop Hermle-Benchmark model. With aircraft grade, premium alloy construction, the 4 x 750ml swing out rotor can withstand centrifugal forces upwards of 4,000 xg with full loads of up to 28 x 50ml or 68 x 15ml tubes.

Advanced microprocessor controls allow for instant rotor identification, which automatically converts the rotational speed to the relevant g-force (rcf), preventing the user from setting a speed above the capabilities of the installed rotor. In addition to retrieving saved programs, the easy to use front panel can adjust accel/decel rates, and change the end of run alarm tone.

Rotor exchange is simple and requires less than one minute. An included rotor wrench can be used to loosen and install all rotors. As soon as the rotor is placed on the motor shaft, the identification process activates and the installed rotor code is displayed on the backlit LCD display.

VORNADO™
MINIATURE VORTEX MIXER

—|— **Powerful vortexing, for tubes up to 50ml**

—|— **Insta-Touch™ pressure activated operation**

—|— **"Mini" sized, less than 4" wide**

Insta-Touch™ pressure activation   Extremely compact

Powerful is the best word to describe this **mini** vortexer. With a 4mm orbit and fixed speed of 2,800rpm, the Vornado instantly vortexes even the largest samples, including nearly full 50 ml tubes. Despite its powerful motor, the Vornado has a footprint of less than 4x4 inches, allowing it to fit on the most crowded bench.

Insta-Touch operation means that the motor is automatically activated with slight pressure on the center of the cup head. Operation is smooth, quiet and efficient. When pressure is removed, operation of the motor ceases.

The Vornado's unique head design prevents liquids from entering the housing, prolonging motor life. The unit is available with five different color cup heads.

Technical Data:

Speed:	**2,800rpm (fixed)**
Motor Activation:	**Touch**
Orbit:	**4mm**
Dimensions: (W x D x H)	**3.7 x 3.9 x 2.6 in.** **9.4 x 9.9 x 6.6 cm**

BenchMixer™ V2

- **Reversible top: Use "Cup" or "Flat/Dimpled" Surface**
- **Powerful motor for INSTANT vortexing**
- **Q-Drive™ dynamic balancing system**
- **Variable speed with touch or continuous operation**

Flip Over

Side 1 — **Cup** Side 2 — **Flat/Dimpled**

Flat/Dimpled — Cup — **Reversible Top**
The BenchMixer™ V2 utilizes a smooth and powerful mixing technology similar to the original BenchMixer, with the advantage of a uniquely designed reversible rubber head that can be attached to the mixer in two orientations. For the vortexing of single tubes, the cupped surface would generally be preferred. However, for applications requiring a flat/dimpled surface for mixing uniquely shaped vessels (or a handful of multiple test-tubes), the head can easily be flipped over and reattached in reverse orientation.

Like the original BenchMixer, the drive system is balanced with Q-Drive™ technology, providing a smooth vortexing action, while minimizing noise and excessive vibration. This results in quieter, more efficient and longer lasting operation. With a maximum speed up to 3,200 rpm, the mixer provides an instant vortex of even the largest sample sizes, including full 50ml tubes.

MORTEXER™
MORE Power, MORE Flexibility... MORE Vortexer!
- **The only vortexer available with *Multi-Head™***
- **Powerful motor for INSTANT vortexing**
- **Q-Drive™ dynamic balancing system**
- **Variable speed from 200 to 3,200 rpm**

Unique Multi-Head allows for standard vortexing, **PLUS** holds up to 8 microtubes

Available Accessories:

BV1000-FLAT	BV1000-COMBO	BV1000-H500	BV1000-H150	BV1000-H15

The Mortexer™ is MORE than your standard vortex mixer. The unique design of the Multi-Head™ (included) features a traditional cup head for general purpose mixing, plus holds up to eight microcentrifuge tubes. The drive system is balanced with Q-Drive™ technology, providing a smooth vortexing action, while minimizing noise and excessive vibration. This results in quieter, more efficient and longer lasting operation.

Other features include: "no-walk" suction feet, cold room/incubator compatibility and spill-proof electronic controls.

3.6mm

+ **Hands free, high capacity vortexing**

+ **Up to 2500rpm, a true vortex in every tube**

+ **Pulsing function for interval vortexing**

+ **Wide assortment of accessories for a variety of tubes and plates**

+ **Suitable for use with QuEChERS**

Available Accessories:

50 x 1.5/2.0ml	15 x 50ml	50 x 5 or7ml	3 x microplates	9 x 50ml Horizontal QuEChERS

The BenchMixer™ XL is a heavy duty vortex mixer designed for hands-free mixing in tubes, flasks, vials or cylinders. It is ideal for the QuEChERS pesticide analysis method and is instantly adaptable to an exceptionally broad range of vessels, racks and applications (horizontal or vertical). The precisely balanced drive system includes an oversized motor that delivers accurate, reproducible speeds up to 2,500rpm with rattle-free operation and minimal vibration. The programmable pulsing function allows for time specific interval mixing, increasing agitation.

The 7x12 inch platform accommodates a wide variety of standard, pre-drilled tube racks (a complete listing can be found in the ordering information section below). Additionally, BenchMixer XL can easily be adapted to almost any type of vessel commonly found in the laboratory.

Using BenchMixer XL is easy; after loading the sample rack and tightening the locking knobs, select the desired speed and run time on the large digital control panel. Then, simply press "Start" and the BenchMixer XL will perform unattended mixing for up to 100 hours.

BenchMixer XL's large capacity and adaptability make it an ideal choice for the medium to high throughput laboratory.

BenchRocker™ 2D **Variable Speed Rocker (2D)**

0 to 30°

Adjustable tilt & speed for a wide range of applications

Large 14x12" work surface

Safe for incubator or cold room use

Optional Stacking Platform (clearance: 3")

The BenchRocker 2D is designed to provide the precise speeds and tilt angles required for a broad range of molecular and biological mixing applications. The user can adjust both parameters to match the vessel size and the volume of liquid being mixed, yielding optimum results.

Technical Data:

Speed Range:	Variable, 2 to 30 rpm
Tilt Angle:	Variable, 0° to ± 30°
Platform Size:	14 x 12 in. / 35 x 30 cm
Load Capacity:	8 lbs (3.6kg)

BlotBoy™ Low Speed Gyratory Rockers (3D)
- **Optimized speed & tilt for blotting, washing and staining**
- **Tri-directional motion for thorough, gentle mixing**
- **Cold room and incubator safe**

Modeled after our popular BioMixer™ series of "nutating" shakers, these platform rockers provide the perfect 3-dimensional motion for all blot related applications. Their tilt angle and speed have been optimally set for gentle, but thorough mixing in gel trays, boxes and other flat vessels.

Technical Data:

Speed Range:	Fixed, 12 rpm (230V: 10rpm)
Tilt Angle:	Fixed, ± 8°
Platform Size (B3D1008):	10.5 x 7.5 in. / 27 x 19 cm

with INSTA TILT™

- **Adjustable speed & tilt for a wide range of applications**
- **Large 12x12" work surface**
- **Insta-TILT™ technology for instant adjustment of tilt angle**
- **Cold room and incubator safe**

Optional Stacking Platform (clearance: 3")

The BenchRocker 3D is designed to provide the precise speeds and tilt angles required for a broad range of molecular and biological mixing applications. The user can adjust both parameters to match the vessel size and the volume of liquid being mixed, yielding optimum results. Proprietary Insta-Tilt™ technology means no tools, no disassembly. *Simply grip the platform with two hands and move to the desired position.*

This model includes both flat and dimpled (autoclavable) mats for mixing a wide variety of tubes and other vessels. A stacking platforms can be purchased as an accessory, effectively doubling the usable surface area.

BenchRocker 3D features a maintenance free, brushless motor, capable of loads up to 5 lbs and is safe for use in cold rooms and incubators.

Technical Data:

Speed Range:	**Variable, 2 to 30 rpm**
Tilt Angle:	**Variable, 0 to ± 30°**
Platform Size:	**12 x 12 in. / 30 x 30 cm**

BenchWaver™ **Undulating Rocker (3D)**

BENCHWAVER™

- **Undulating, 3-dimensional motion**
- **Adjustable speed and tilt**
- **Large, 13 inch platform**
- **Ideal for staining, washing and general mixing**

B3D5000 with B3D5000-STK   B3D5000 with B3D5000-DIMP

The BenchWaver™ combines the basic rocking motion of traditional platform rockers with the circular motion of an orbital shaker. This combination is ideal for generating the optimum 3-dimensional "undulating" motion commonly preferred for molecular biology applications.

The tilt angle is instantly adjustable (no tools or disassembly required) from 0 to 10° and the mixing speed can be adjusted from 5 to 105 rpm, using the large, user-friendly LCD control panel. Combined control of both parameters (tilt and speed) makes the BenchWaver a versatile workhorse that can provide anything from gentle, slow moving waves to a rapid, more vigorous motion. Additionally, time of operation can be selected from 1 minute up to 99 hours or for continuous operation.

The large 13.5 x 13 inch platform is supplied complete with a non-slip, rubber mat. An optional stacking platform is available for users requiring additional mixing capacity. BenchWaver is a reliable and versatile instrument and can be used in refrigerated or incubated environments from 2° to 60°C.

Technical Data:

Speed Range:	**Variable, 5 to 105 rpm**
Tilt Angle:	**Variable, 0 to ± 10°**
Platform Size:	**13 .5 x 13 in. / 34 x 33 cm**
Load Capacity:	**20 lbs (9kg)**
Operating Temp. Range:	**+4°C to +60°C**
Dimensions: (W x D x H)	**13 x 13.5 x 9.75 in. 33 x 34 x 24.75 cm**
Stacking Clearance:	**4.5 in. / 7.6 cm**
Weight:	**12 lbs (5.5kg)**
Electrical:	**Universal Voltage: 100 to 240V, 50-60Hz, 50W**
Warranty:	**2 Years**

Ordering Information:

Item No.	Description:
B3D5000*	**BenchWaver with platform and flat mat**
B3D5000-STK	Optional stacking platform (4.5" clearance) with flat mat (13.5x13")

Orbi-Blotter™ **Low Speed Orbital Shaker**

19mm

ORBi-BLOTTER™

C E

Optional Stacking Platform (Clearance 3")

+ **Gentle orbital motion for gel applications**
+ **Large 14 x 12 in. work surface**
+ **Incubator and cold room safe**
+ **Variable speed control, 3 to 70 rpm**

The Orbi-Blotter™ features a gentle orbital motion with speed control down to as little as 3 rpm, making it the ideal orbital choice for low speed applications, such as blotting, washing, staining/destaining, etc. A large 14x12 in. work surface is included along with a non-slip rubber mat for holding trays, dishes, plates and other flat vessels.

An optional stacking platform can be purchased as an accessory, effectively doubling the usable work surface. The maintenance free, brushless motor is capable of loads up to 4kg and is safe for use in cold rooms and incubators.

Technical Data:

Speed Range:	**Variable, 3 to 70 rpm**
Motion / Orbit:	**Orbital / 19mm**
Load Capacity:	**3 x 2L or 9 lbs (4kg)**

ORBi-SHAKER™ CO$_2$
Remote Controlled, All Environment Shakers

- **Designed to fit and maximize capacity in most CO$_2$ incubators and chambers**
- **Remote controlled, adjust settings without disturbing the CO$_2$ environment**
- **Instantly exchange flask clamps with MAGic Clamp™ accessories**

C E

Remote controller adjusts shaker settings from outside of the chamber and magnetically attaches to most incubators

The new Orbi-Shaker CO$_2$ series is designed for shaking, mixing & aeration applications in extreme environments, including CO$_2$ incubators. It can withstand temperatures from 0 to 65°C and humidity levels up to 100%.

To avoid contamination, unintentional release of gas or deviations from protocol, all settings are adjusted via the included remote control module. This module can be stored outside of the chamber and connects to the shaker via a flat (1mm thickness) cable, that easily passes through a port or underneath an incubator door without compromising the seal. This allows for user adjustment of run time or mixing speed without opening the chamber door(s).

The instrument is supplied with a non-slip rubber mat platform. In addition, convenient MAGic Clamp™ platforms (of multiple sizes) are also available for use with Erlenmeyer flasks and test tube racks. The unique magnetic attachment method has been widely recognized as the easiest way to instantly change between flask clamps of different sizes.

Roto-MiNi™

Includes tube holders for common tube sizes

Available with variable speed control and advanced shaking/mixing modes:

- Mix (Oscillating)
- Pause
- Rock

Also offered with incubation (See Page 57)

Roto-MiNi™ *PLUS*

C E

Benchmark's new Roto-Mini series of rotating mixers provides a wide range of mixing capabilities, suitable for an array of laboratory applications including resuspension, protein binding, nucleic acid purification, histochemistry, hybridization etc. The mixers include interchangeable tube holders for accomodating all common tube sizes from 0.5ml to 50ml. and the motion can be adjusted from vertical (end over end) mixing, to horizontal (rolling or hybridization style) mixing.

Roto-Mini rotators are available in the "Plus" configuration. The Plus models provide the following additional features:

Variable speed:	5 to 70rpm
"Mix" function:	Rotating in combination w/ oscillations (increased mixing)
"Pause" function:	Rotating with intermittent "stops" during rotation
"Rock" function:	Back and forth, gentle rocking motion (see-saw)

The Plus models also offer an additional rocking platform (4.5 x 3 in.), as well as a 96 x 0.2ml tube/strip/plate holder for mixing PCR vessels in the "Mix" (oscillating) mode

Included Tube Holders:

R2020-1520	R2020-0507
11 x 1.5/2.0ml	5 x 5-7ml (12-13mm)

R2020-150	R2020-500
5 x 10-15ml (16-17mm)	6 x 50ml & 24 x 0.5ml

Optional Tube Holders:

										Custom Modes	Platform Rocking Mode	Pause / Mix

The Roto-Bot™ Rotating Mixers feature advanced programming options that far surpass that of the traditional laboratory rotator. With digital speed control and more than 10 operating modes, the Roto-Bot can be selected to perform a wide variety of rotating, mixing and vibrating actions. In addition, these actions can be combined in succession using the C1 and C2 "Custom Modes", providing the user with a nearly infinite level of programming.

The Roto-Bot and Roto-Bot Mini each inlcude an assortment of vertical tube holders. The Mini model is supplied with holders for 12 x 1.5ml tubes, 2 x 15ml & 2 x 50ml tubes; the standard model, 30 x 1.5/2.0ml, 8 x 15ml & 2 x 50ml tubes. For higher capacity applications, more of these holders can be purchased as accessories. The unique, sliding attachment allows for quick and easy changing of tube holders. For rocking applications, a platform with a non-slip mat is available. Once attached, simply select the "PP" mode to activate the rocking mode.

Benchmark™ **Rotating Mixer**

- **Adjustable speed and tilt**
- **Reversing mode for increased agitation**
- **Cold room and incubator safe**
- **Includes three rotisseries for all common tube sizes**

Included Rotisseries:

48 x 1.5/2.0ml
(48 x 10-14mm Ø tubes)
20 x 15ml
(20 x 15-20mm Ø tubes)

12 x 50ml
(12 x 25-35mm Ø tubes)

The Benchmark Rotating Mixer provides gentle to vigorous mixing of laboratory samples up to 50ml. With adjustable speed control and tilt angle, the Rotating Mixer is ideal for a variety of applications, from mixing blood samples to the preparation of homogenous dispersions.

Three rotisserie tube holders are included for mixing all common laboratory sample tubes and each individual tube holder is constructed of rubber coated steel to provide a secure grip, preventing any "wobble" or loosening during mixing at high speeds.

A unique reversing mode is selectable for more intense mixing. In reversing mode, the mixer rotates for up to 360° then stops and rotates in the reverse direction. This back and forth motion occurs repeatedly until the set time has expired.

With included accessories and unique mixing options, Benchmark's Rotating Mixer offers increased flexibility that is not commonly found with with traditional laboratory rotators.

Technical Data:

Speed:	**1 to 40rpm**
Tilt Angle:	**0 to 90° (vertical to horizontal)**
Capacity:	**12x50ml, 20x15ml or 48x2.0ml**
Timer:	**1 sec. to 9 hrs or continuous**
Exterior Dimensions: (W x D x H)	**8.25 x 10.5 x 12.5 in. 21 x 27 x 32 cm**
Operating Temp. Range:	**+4° to +65°C**
Weight:	**7 lbs (3.2kg)**

R3005

R3005 shown with Vacutainers™
R3005 shown with 15ml conical tubes

Benchmark TubeRollers are designed for the gentle, thorough mixing of a variety of containers, including Vacutainers™, bottles, test tubes, centrifuge tubes and roller bottles. Both models (5 roller and 10 roller) operate at a constant 38rpm, chosen as the optimum speed for the broadest range of mixing requirements.

As the roller mechanism rotates through each complete revolution, the right side of each roller is gently elevated approximately 0.5 in (13mm) and returns to the horizontal starting position. This additional, gentle up/down motion provides a "wave" effect and guarantees that the entire sample is subjected to complete, thorough mixing, end to end. This built in tilt feature provides a level of homogeneous mixing uniformity that can not be matched by any stationary roller apparatus.

From blood collection tubes to roller bottles, Benchmark TubeRollers are the ideal choice for research, clinical laboratories and doctors' offices.

Technical Data:

Speed:	Fixed, 38 rpm (±10%)	
Motion:	Simultaneous roll & tilt (±5°)

D1000 **Homogenizer**

- **Quickly homogenizes samples (in under 30 seconds)**
- **For volumes 100µl to 250ml**
- **Supplied with two generator probes (5mm and 7mm)**

Benchmark's handheld homogenizer, the D1000, is designed to rapidly homogenize, emulsify, suspend and disrupt biological samples. Ideal for use with microtubes, the homogenizer works well with samples from 0.1ml to 250ml (depending upon the generator probe used).

The D1000 is a rotor stator homogenizer which works by drawing the sample, in liquid, into the generator probe with the variable speed rotor, and then forcing it out through the slots in the stator. This achieves mechanical shearing of the sample. As the sample is repeatedly drawn up and forced through the stator, additional shearing takes place.

A powerful, 130W motor drives the rotor at speeds from 8,500 to 30,000 rpm. Speed is adjustable in six steps to meet sample processing needs. A separate on/off switch allows the homogenizer to be left at the appropriate setting.

Generator probes are available in four sizes. The 5mm and 7mm diameter have a 50mm length for use with samples in microbtubes. The 10mm x 115mm is ideal for use with 15 and 50ml tubes and 14mm x 130mm, for 50ml tubes and vessels up to 250ml. The unit is supplied with one each of the 5mm and 7mm generator probes. All the generator probes are made of stainless steel and can be sterilized by autoclaving.

BeadBug™ 3 & 6 **Microtube Homogenizers**

+ Extremely powerful mixing action for lysis, grinding or homogenization

+ Eliminates the cross contamination associated with hand-held homogenizers

+ Faster & more effective than tissue grinders

+ Process multiple tubes simultaneously

The BeadBugs™ are high energy benchtop homogenizers that set the performance standard for personal sized cell disruption and lysis instruments. Simultaneous homogenization of up to 6 samples takes place (often within 45 seconds) inside the disposable 2ml screw cap microtubes. The optimized mixing motion causes rapid cell disruption through constant high velocity impact from the hardened micro-beads chosen specifically for your sample type.

Developed for samples too tough to be homogenized in a common lab vortexer, the BeadBugs provides a convenient and economical alternative to larger and more expensive homogenizers on the market today. With compact footrpints (as small as 7 x 8", in the 3 position model), the Beadbugs are the the ideal homogenizing instruments for low to medium throughput laboratories.

BeadBug 3, accepts 3 x 2.0ml   BeadBug 6, accepts 6 x 2.0ml   Video Demonstration

Benchmark offers a wide range of homogenization beads (including glass, zirconium, stainless steel, etc.)

BeadBlaster™ 24 Microtube Homogenizer

- Fast, efficient homogenization, usually in 35 seconds or less
- For all sample types, from soft tissue to bone
- High throughput, up to 24 samples
- Sealed 2.0ml tubes, no cross contamination

The BeadBlaster™ 24 completely lyses, grinds and homogenizes a broad variety of biological samples. Even the most difficult and resistant samples are fully homogenized, often in 35 seconds or less. The stainless steel tube carrier subjects up to 24 samples to an optimized, high speed, 3D motion, producing high energy impacts between the samples and micro-beads to release cellular contents. To protect heat sensitive samples, the unit can be digitally programmed to operate in shortened consecutive cycles with a rest period in between.

Benchmark offers an assortment of prefilled tube kits for a variety of sample types. The popular Triple-Pure™ kits include acid washed, heat treated, zirconium beads. The beads are tested to be free of nucleases, making them ideal for molecular biology applications. A convenient starter kit (D1032-SK) is available to accommodate a broad range of samples and optimize applications.

BactiZapper™ MicroSterilizer / Cinerator

6.5"

- **Complete sterilization in 5-7 seconds**
- **Safe, convenient and no spatter**
- **Ideal for platinum loops, needles and glass tube mouths**

The BactiZapper™ uses well-proven technology to provide nearly instantaneous sterilization of platinum inoculating loops, needles, glass tube/pipette mouths and various metal and borosilicate glass instruments. The asbestos-free core element quickly heats to 815°C (1500°F) to provide complete sterilization of items in 5-7 seconds. A lower temperature setting (500°C) serves as a "standby" setting and extends usable life of the heating element.

The ceramic heating element is safely enclosed in a perforated stainless steel guard chamber, protecting users from accidental contact with the extreme temperatures of the core. It is compact and can be used in anaerobic and aerobic chambers.

Technical Data:

High Temperature Setting:	815°C / 1500°F
Low Temperature Setting:	500°C / 950°F
Sterilization Time:	5 - 7 seconds
Chamber Diameter:	0.55 in. / 14mm
Chamber Length:	6 in. / 153mm
External Dimensions: (W x D x H)	4 x 6 x 6.5 in. 10.2 x 15.2 x 16.5 cm

Bacti-Zapper Tilt

+ **Adjustable tilt angle, for more ergonomic inoculation (reduces hand fatigue)**
+ **Same convenient operation as popular "Classic" model**
+ **Available as "XL", with wide chamber for sterilizing large vessels** (tubes, flask mouths, etc.)

Adjustable Angle (55°)

BactiZapper Tilt

35mm chamber for tubes, flask/ bottle necks, etc.

35mm

BactiZapper Tilt XL

The BactiZapper™ TILT Series utilizes the same well-proven technology of our original Bacti-Zapper Classic, but with a unique, adjustable head angle that allows for more convenient sterilization. When loosened, the adjustment knob can be shifted upward or downward, resulting in a tilt angle range of 55°C.

The "XL" model offers an increased chamber diameter of 35mm, making this product more suitable for the sterilization of larger objects, such as tube mouths or flask necks. Both models feature a lower temperature "standby" setting to extend the usable life of the heating element.

Technical Data:

Model:	Bacti-Zapper TILT	Bacti-Zapper TILT XL

BioClave™ Research Autoclaves

BioClave™
B4000-16

B4000-M

BioClave Mini

BioClave 16

- Fully automatic, just press start
- Rapid, complete sterilization
- Extremely compact
- Built in water tank, does not require connection to an external water supply

Despite the space-saving exterior dimensions of the BioClaves, the stainless steel sterilization chambers are surprisingly large, accommodating a variety of liquids, media, instruments, glassware, plasticware and other common laboratory items. Both of these benchtop models include a mechanical and electrical safety interlock that prevents the door from being opened until the pressure has been released.

With large digital displays and fully automatic operation, all segments of the sterilization cycle (fill, sterilize, exhaust and dry) commence and run to completion by simply pressing the start button. An optional thermal mini-printer is also available for providing a record of sterilization parameters. In addition, a built in USB port allows for transfer of these parameters to a computer for printing or storage of cycle data.

Both BioClaves offer three cycle options (standard programs), which are preset for the sterilization of liquids, wrapped instruments or unwrapped instruments/plasticware. A fourth option "Dry Only" is also available for additional drying time to be added to the end of a cycle. For special applications, requiring variations in cycle parameters, all settings on the BioClaves are fully adjustable.

BioClave™ 28 Research Autoclave

BioCLAVE 28

+ **Accepts bottles/flasks up to 2L**
+ **Fully automatic, just press start**
+ **Adjustable sterilization times**
+ **USB port for digital documentation of records**
+ **Built in water tank, does not require connection to an external water supply**

CE

With similar operation to the BioClave Mini and BioClave 16, the new 28 liter model features an increased chamber size with a diameter of 32cm. With this larger internal chamber, the BioClave 28 is our only model capable of sterilizing 1 and 2 liter flasks and bottles.

Despite the increased chamber size, the unit is still relatively compact, suitable for benchtop use. Operation is fully automatic, meaning all segments of operation (fill, sterilize, exhaust and dry) commence and run to completion by simply pressing "Start". An optional thermal mini-printer is also available for providing a record of sterilization parameters. In addition, a built in USB port allows for transfer of these parameters to a computer for printing or storage of cycle data.

All BioClaves offer three cycle options (standard programs), which are preset for the sterilization of liquids, wrapped instruments or unwrapped instruments/plasticware. A "Dry Only" option is also available for additional drying time to be added to the end of a cycle. For special applications, requiring variations in cycle parameters, the cycle times are fully adjustable.

Temperature Control Equipment

Digital Hotplates, Stirrers & Hotplate Stirrers

- **Large, 7 x 7" white ceramic top plate**
- **Safety LED indicates hot surface**
- **5L stir capacity**
- **Control actual sample temperature (with optional probe)**

H3770-H   H3770-S   H3770-HS

Benchmark hotplates, stirrers and hotplate-stirrers feature an exceptionally durable, chemical resistant, white ceramic work surface. The space-efficient design (7.5 X 11.5 in. footprint) makes them ideal for use on crowded benchtops, biological safety cabinets and in bio-hoods. Advanced microprocessor controls allow quick, precise adjustment of speed and temperature. The display provides constant visualization of the speed and temperature while a safety LED indicates when the top plate is above 50°C. In addition, an optional probe is available for applications that require precise temperature con-tol. When connected, the probe provides direct feedback to the microprocessor, which continuously adjusts and maintains the selected temperature *in the sample* within +/- 1°C.

With a square 7 in. work surface, all models are compatible with a wide variety of popular sizes of borosilicate glass beakers, flasks, bottles and other vessels. An optional support rod (H3770-ROD) is available for mounting thermometers, temperature probes, etc.

Technical Data:

Speed Range:	**150 to 1500 rpm***
Temp. Range:	**Ambient +5°C to 380°C***
Platform:	**7 x 7 in. / 17.8 x 17.8 cm**

Digital temperature control

Personal sized, 13 x 14.5 in. footprint

Two models
   - Heat only
   - Heat & cool

With digital temperature control, the myTemp incubators provide convenient "set and walk away" operation, eliminating the need for external thermometers and repetitive "fine tuning" of an analog control knob. Simply choose the desired temperature and the incubators quickly begin to heat (or cool in the -HC model only). Throughout the incubation, the chamber temperature is constantly monitored and displayed in real time on the large LED control panel.

Despite a modest footprint of 14.5 x 13", the myTemp incubators feature large internal chambers, capable of accepting flasks and bottles up to 2 liter.   The chamber temperature is accurately maintained with a unique airflow design that utilizes multiple internal fans, resulting in a high level of uniformity.

The incubators include two adjustable/removable shelves for increased capacity. A mini nutating rocker (supplied with both flat and dimpled mats) is also available for agitation of samples during incubation and can plug directly into an included internal power outlet.

myTemp Mini shown with H3D1020
(Rocker plugs directly into the internal power outlet)

Technical Data:

H3D-1020	Mini nutating rocker, 6x8" platform, 115V
H3D-1020-E	Mini nutating rocker, 6x8" platform, 230V
H2200-SH	Extra shelf, 10.5 x 8 in. plastic (not autoclavable)

*Includes US plug.   For EU plug, please add (-E).

SURETEMP™
## Dual-Convection Incubators with SureCheck™ Data Logging

╤ **Precision temperature control up to 75°C**

╤ **Dual-Convection, user adjustable to gravity or mechanical convection**

╤ **Stainless steel internal chamber**

╤ **Internal power outlet for shakers, mixers, etc.**

╤ **SureCheck™ data logging port and software**

C E

The new Sure-Temp Incubator series provides the highest level of temperature control with uniformity and stability levels that are unmatched by competitive models in the same price class.

Each incubator is equipped with the SureCheck™ data logging system for verification of chamber temperature. The SureCheck system records temperature data points as often as every 60 seconds and stores this information on a flash drive. The data can then be viewed and saved using the included the Sure-Check software. The recorded data can also be used to draw a temperature graph or exported to excel for further analysis or manipulation.

Unlike the vast majority of laboratory incubators, the Sure-Temp series offers "Dual-Convection" technology, allowing users to choose between mechanical convection mode (for exceptional uniformity) or gravity convection mode (for longer incubations where drying of plates may be an issue). Heating elements are strategically located on all sides of the chamber and contents can be viewed with the separate inner glass door without disrupting the temperature environment.
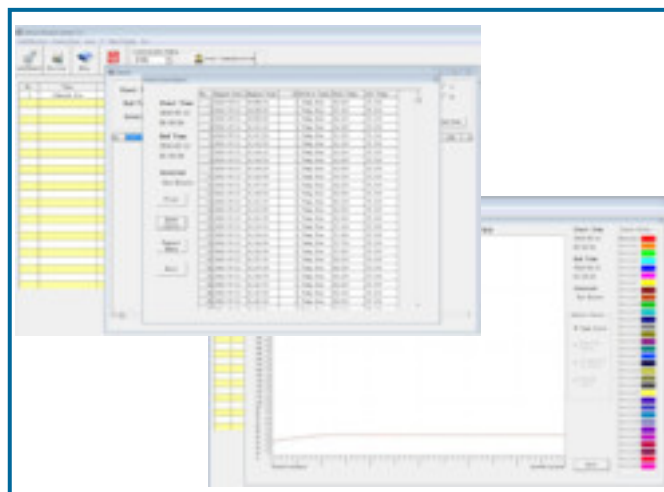

Included Sure-Check™ Software: View/save recorded temperatures

my**TEMP**™ 6SHC

Precision, Heating & Cooling Incubator

+ **Accurate temperature control from 0°C to 60°C**
+ **Powerful compressor, maintains 0°C**
+ **Stainless steel chamber**
+ **Internal power outlet for shakers, mixers, etc.**
+ **Sized for floor standing use or on bench-tops less than 32" high**

One model for
HEATING & COOLING

CE

Stainless steel chamber with internal outlet & light

The myTemp 65HC Incubator is designed to provide accurate and uniform temperature control from 0° to 60°C. The broad temperature range of the instrument expands the use of this incubator to both heating and cooling applications.

A large, digital display allows for visualization of the chamber temperature and the remaining incubation time, while an internal light is included for improved visualization of the chamber. In addition, a built in, internal outlet can be used to provide power to small instruments, such as shakers, rockers, etc.

With forced air technology and stainless steel inner construction, uniform heat transfer is ensured throughout the chamber. When set for sub-ambient temperatures, the powerful compressor is activated, quickly cooling the chamber to the desired temperature.

With an exterior height of 39 inches (100cm), the incubator is designed to be floor-standing, yet is also compact enough for bench use. (Not recommended for use on benchtops higher than 32"/81cm). The instrument is supplied with two, adjustable height shelves, while additional shelves can also be purchased separately (item: H2265-SH).

Technical Data:

Temp. Range:	0°C to 60°C (Ambient -25°C to 60°C)
Temp. Accuracy:	0.5°C (at 37°C)

my TEMP Mini CO2

+ **Ideal for cell culture**
+ **Digital temperature control**
+ **Personal sized, 13 x 14.5 in. footprint**
+ **Dual beam IR sensor for fast response time and accurate control over CO₂ percentage**

CE

At only 13 inches wide, the myTemp Mini CO_2 is the smallest and most economical incubator for culturing cells in a CO_2 environment. Its small footprint makes the incubator ideal for use inside of biological safety cabinets, isolating sensitive cultures or for any laboratory simply trying to conserve bench space.   With a thick layer of high efficiency insulation surrounding the chamber, the incubator is also ideal for transportation of cells. Once power has been disconnected, the incubator maintains temperature levels within 10% of the set parameter for up to 1 hour. In addition each model includes a 12V vehicle power adapter for operating the instrument in a car, boat, etc.

Both temperature and CO_2 percentage are digitally adjustable and displayed in real time on the large LED control panel. This panel also features a "Cal" function, for easy in-lab calibration of the temperature or CO_2. In addition, humidity (up to 80%) can be added to the chamber by inserting the included, stainless steel humidity reservoir.

To protect fragile samples, the CO_2 level is constantly monitored using dual beam infrared sensing technology. In the event of a drop in CO_2, audible and visual alarms are triggered, notifying the user of the error.

Despite its small size, the incubator features a relatively large 20L chamber with the capacity for flasks and bottles up to 2 liters. Two removable, stainless-steel shelves are included. The shelves are perforated to improve airflow within the chamber.

Technical Data:

Temp. Range	**Ambient -10° to 55 °C**
Temp. Accuracy:	**± 0.25 (at 37°C)**

*Includes US plug.   For EU plug, please add (-E).

- **Precision temperature control, six-sided heating**
- **Heated door and door frame prevents chamber/door condensation**
- **Excellent accuracy and recovery with dual beam IR sensor for measuring CO_2**
- **Plus models include:**
  - **High heat decontamination**
  - **Digital humidity control**
  - **Split inner door**

Included with PLUS models:

Digital humidity control
For delicate cells prone to dessication, the PLUS series of CO_2 incubators allows for control over the relative humidity. Humidity can be controlled up to 95 percent utilizing a reservoir to vaporize and inject moisture into the chamber.

High heat decontamination
Contamination of samples can result in a large loss of both time and money. To prevent contamination the PLUS models inlcude a convenient high heat decontamination cycle that exposes the chamber to 125°C for 8 hours.

Split inner door
Each time that the door of a CO_2 incubator is opened, sample contamination is at risk. With the unique design of the Benchmark PLUS models, access to samples can be achieved by opening a small window within the glass door, reducing this risk by up to 80%. 45P: 2 windows / 180P: 6 windows.

myBlock™ Series Digital Dry Baths

myBlock II
(dual chamber dry bath)

myBlock I (single chamber drybath)

C€

my BLOCK™

- ┼ **Hinged cover improves uniformity and conserves energy**
- ┼ **Optional external temperature probe for control of actual sample temperature**
- ┼ **Unique Quick-Flip™ universal micro-block**

Benchmark's myBlock™ series are the first digital dry baths to include advanced microprocessor controls, timed operation and a removable, hinged lid. In addition, an optional external temperature feedback probe can be positioned directly inside a sample tube, providing real-time control and monitoring of *actual* sample temperature.

Both the single and dual block models can be ordered in a configuration that includes our unique Quick-Flip™ blocks. These universal blocks accept tubes from 0.5 to 2.0ml and with just a quick flip to the other side, accommodate 0.2ml tubes, PCR strips or (in the dual block model only) a PCR plate. In addition, a wide variety of blocks are available for tubes up to 50ml.

iSoBLOCK™
Two Independent block chambers

- **Two isolated chambers**
- **Independent time & temperature control**
- **Hinged cover improves uniformity and conserves energy**
- **Unique Quick-Flip™ Universal Micro-Block**

CE

Video Demonstration

The unique IsoBlock™ contains two isolated block chambers. Each chamber is controlled independently, allowing the dry bath to serve as two dry baths in one. The hinged (and removable) lid is designed with a dividing wall. When the lid is closed this dividing wall acts as a barrier, preventing air transfer between chambers.

The control panel features large digital displays of both time and temperature. At any point, either setting of a block can be adjusted, without affecting the settings of the other block.

A wide variety of blocks are available for accommodating nearly all popular tubes sizes. In addition, the unique Quick-Flip™ universal blocks accept tubes from 0.5 to 2.0ml and, with just a quick flip to the other side, accomodates 0.2ml tubes or PCR strips.

my BLOCK Mini

+ **Compact, fits on any crowded benchtop**
+ **Available in heat only, or** <u>**heat & cool versions**</u>
+ **Exchangeable blocks for 0.2 to 50ml tubes**
+ **Clear cover improves temperature uniformity**
+ **Link 2 consecutive temperature steps** (cooling model only)

With its compact construction, broad temperature range, and multiple block options, the myBlock Mini is the perfect tool for laboratory incubations. The simple touch pad controls and a digital display provide for "set and walk away" temperature selection and unrivaled accuracy.

While perfect for bench use, the optional 12V adapter expands the utility of the myBlock Mini to field use. At less than 4.3 inches wide, myBlock Mini is truly the first personal heat block.

my BLOCK HL
With Heated Lid

Prevents evaporation and condensation

Ordering Information:

Item No.	Description:
BSH200-HL*	myBlock HL Mini Digital Dry Bath with heated lid
BSH100-02	Block, 40 x 0.2ml or 5 PCR strips
BSH100-05	Block, 24 x 0.5ml
BSH100-15HL	Block, 15 x 1.5ml

*Includes US plug. For EU plug, please add (-E).

For technical data, please see above (myBlock Mini).

Temp Accuracy: ± 0.3°C

The new myBlock™ HL is the first and only mini heat block featuring a heated lid for protecting samples against unwanted condensation and evaporation. Both the block and lid temperature can be selected independently, making this myBlock the ideal choice for the most temperature sensitive applications, including LAMP assays, immunoassays, enzyme reactions - anywhere reactant concentration is critical.

+ **Digital accuracy and convenience**
+ **Seamless, stainless steel chamber**
+ **Quik-CAL™ user calibration function**
+ **Hinged lid is also removable**

The myBath series water baths are designed to guarantee superior accuracy and performance in a compact footprint. Easy to use controls allow the user to digitally select and monitor settings. Adjustable in 0.1 degree increments, the temperature is shown on a large, 3-digit display. The proprietary Quik-CAL™ feature allows for simple, in-lab calibration. High efficiency insulation maintains temperature stability and uniformity within the bath, while keeping the housing cool to the touch.

All myBath models feature seamless, stainless steel chambers for easy cleaning and long life. The chambers resist rust and have no corners to collect dirt or contamination. The larger 8L and 12L units have drains for hassle-free water changes.

The 4L, 8L, and 12L models include a see-through cover that can be removed, or flipped back on a rear hinge to conserve bench space. The lid's gabled design** will divert condensation to the front and back of the bath, away from samples. Racks are available to accommodate 1.5/2.0ml, 15ml and 50 ml tubes within the 4L, 8L and 12L baths. The myBath 4L is supplied with all three racks.

**The 2L model includes a flat, removable lid and adjustable temperature in increments of 1°C.

SB-12L Shaking Water Bath

- **Orbital shaking motion**
- **Included spring platform accepts tubes, bottles and flasks**
- **Compact design, conserves bench space**
- **Digital control and display of time, temperature, and speed**

This compact shaking water bath utilizes the well proven, beltless motor drive system from the Benchmark Orbi-Shaker™ Series, with the addition of precision temperature control up to 80°C.

The seamless, stainless steel chamber has a 12 liter capacity. The unit is supplied complete with a universal spring platform for securing 15 & 50ml test tubes, as well as Erlenmeyer flasks and media bottles up to 1 liter. A hinged and removable lid is also included to reduce energy waste, prevent splashing and divert condensation away from samples.

Easy to use controls allow the user to digitally select and monitor time, temperature and shaking speed, while a constant feedback system ensures accuracy over each parameter.

Optional test tube racks are available for microtubes, and custom-designed racks can also be made available by request.

Capacity Chart:

	Bottles/Tubes	Flasks
0.5ml	40	N/A
1.5/2.0ml	40	N/A
15ml	63	N/A
50ml	15/30	12
125ml	8	8
250ml	4	3
500ml*	2	2
1000ml*	2	1

*Height of vessel may limit ability to close included lid.

Roto-Therm™ **Incubated Rotator**

- **Rotated mixing with temperature control**
- **Includes tube holders for common tube sizes**
- **Available with variable speed control and advanced shaking/mixing modes:**
  - **Mix (oscillating)**
  - **Pause**
  - **Rock**

Included Tube Holders:

R2020-1520	R2020-0507
11 x 1.5/2.0ml	5 x 5-7ml (12-13mm)

R2020-150	R2020-500
5 x 10-15ml (16-17mm)	6 x 50ml & 24 x 0.5ml

Optional Tube Holders:

R2020-PCR	R2020-RP
96 x 0.2ml	Mini Rocking Platform

Benchmark's new Roto-Therm series of rotating mixers provide a wide range of mixing capabilities. Suitable for an array of laboratory applications including resuspension, protein binding, nucleic acid purification, histochemistry, hybridization, etc, the mixers include interchangeable tube holders for accomomodating all common tube sizes from 0.5ml to 50ml. The motion can be adjusted from vertical (end over end) mixing, to horizontal (rolling or hybridization style) mixing.

For applications requiring temperature control, the Roto-Therm series can be digitally programmed to maintain chamber temperatures of ambient +5°C to 60°C and include an "in-lab" calibration function for ensuring accurate temperature control. For applications where temperaure control is not required, the economical Roto-Mini models are available (pg. 30).

Roto-Therm rotators are available in the "Plus" configuration. The Plus models provide the following additional features:

Variable speed:	5 to 70rpm
"Mix" function:	Rotating in combination w/ oscillations (increased mixing)
"Pause" function:	Rotating with intermittent "stops" during rotation
"Rock" function:	Back and forth, gentle rocking motion (see-saw)

The Plus models also offer an additional rocking platform (4.5 x 3 in.), as well as a 96 x 0.2ml tube/strip/plate holder for mixing PCR vessels in the "Mix" (oscillating) mode

Technical Data:

Speed Range: H2020:	**24rpm**
H2024:	**5 to 70rpm**

# Incu-Shaker™ Mini **Shaking Incubator**

INCU-SHAKER™ Mini

- **Domed lid accepts flasks up to 1L**
- **Touch screen control panel**
- **Extremely compact: just 11" wide**
- **Exchange flask clamps in one second with MAGic Clamp™ magnetic system**

The Incu-Shaker™ Mini is the most compact shaking incubator in its class. While this shaking incubator has a remarkably small footprint, the interior is spacious enough to accept a 9.5 x 11" platform as well as clamps for a variety of flasks, tubes and other common vessels. The standard platform (included) features a non-slip, rubber coated surface, ideal for tissue culture flasks, Petri dishes and staining trays.

The convenient MAGic Clamp™ platform is also available for use with Erlenmeyer flasks and test tube racks. This unique, magnetic attachment method is the easiest way to instantly change between flask clamps of different sizes.

+ **Exceptional temperature uniformity**
+ **High capacity, up to 5 x 2L**
+ **Exchange flask clamps in one second with MAGic Clamp™ magnetic system**
+ **Optional shelf for Petri dishes, microplates, etc.**

Video Demonstration

The *INSTANT* flask attachment system

Incu-Shaker™ 10L is a heavy-duty performer, designed for high capacity loads and continuous use. Its outstanding temperature accuracy and uniformity are supported by proprietary heat distribution technology that ensures precisely maintained temperatures throughout the chamber. Inconsistencies due to stratification are reduced to negligible levels and the selected temperature is precisely maintained within 0.25%, even in the corners. In the Incu-Shaker 10LR model, a powerful compressor provides cooling as low as 15 degrees below ambient.

The powerful brushless induction drive is designed for years of trouble-free service, even under continuous use conditions with heavy loads. Noise and vibration are minimized by an advanced motor isolation system. Like other Incu-Shaker models, the 10L is built to last. A standard, rubber mat platform is included and is ideal for use with tissue culture flasks, Petri dishes, staining trays and other flat vessels. The convenient MAGic Clamp™ platform is also available for use with Erlenmeyer flasks and test tube racks. The unique, magnetic attachment method is the easiest way to instantly change between flask clamps of different sizes.

Incu-Shaker™ Mini CO2 **Shaking Incubator**

19mm

Heat · Shake · CO2
The ONLY CO2 Incubator with a MAGic Clamp™ Shaker

- **Integral orbital shaker, ideal for suspension cell culture**
- **Six side direct heating, provides uniform temperature**
- **Stainless steel chamber (SS316), with round corners for easy cleaning**
- **Dual beam IR sensor, fast response time for precise control over CO_2%**

Temperature Stability Chart: Chamber temperature for a 2 hour duration following stabilization (within 0.1°C) at 37.0°C.

MAGic Clamp™ Platform
Optional MAGic Clamp accessories (Patented) are available for attaching erlenmeyer flasks, microplates, test tube racks and other vessels to the shaking platform. This patented design allows for instant, magnetic attachment of clamps without the use of tools, screws and other hardware.

Sealed Inner Glass Door
The inner glass door is transparent, allowing visualization of samples without fully exposing the chamber to the ambient environment, improving performance and reducing energy waste.

Heated Door
The six sided, direct heating design provides the highest level of temperature uniformity (±0.5). In addition, the heated door prevents the forming of condensation on the inner glass door, for improved sample visualization.

Adjustable, pull out shelf
An included stainless steel shelf allows shaking of suspended cells while simultaneously incubating adherent cells. This static shelf can be pulled outward for easy loading/unloading and can be adjusted (or removed) for shaking taller vessels.

Technical Data:

Temperature Range:	Ambient +5° to 60°C (Increments: 0.1°C)

MultiTherm™ Heating/Cooling Vortexer

MULTI-THERM™
COOL – HEAT – SHAKE

- Temperature control from 0° to 100°C
- Exchangeable blocks, for tube sizes 0.2ml to 50ml
- Precision contoured wells for uniform thermal transfer
- Two models: Heat/Cool or Heat only
- Sequence link function for linking or repeating programs (HC model only)

C€

The MultiTherm™ shaker is a temperature controlled vortexer, useful for a variety of molecular biology applications, including:

- Denaturation of DNA, RNA & proteins
- Lipid extractions
- Yeast and bacteria cultivation
- Restriction digests
- Reverse transcription
- DNA/plasmid isolation
- Gentle thawing of biological materials

Despite its modest footprint, the MultiTherm accommodates all common laboratory tubes and plates, including as many as 6x50ml tubes. Speed, temperature and time are set digitally and current as well as set values are continuously shown on the LCD. A heat only model, as well as a heat and cool model are available. The HC model includes a sequence link function for linking together temperature profiles. An integral over-temperature control ensures long life, safety and sample integrity. Blocks are sold separately.

Technical Data:

Temp. Range (HC):	Ambient -20° to 100°C
Temp. Range (H):	Ambient +5° to 100°C
Heating Ramp Rate:	5.0°C / min.
Cooling Ramp Rate:	2.5°C / min. (HC only)
Temp. Accuracy:	± 1.0°C
Speed Range:	200 to 1500 rpm, or "off"
Motion / Orbit:	Orbital / 3mm
Capacity:	Per selected block
Dimensions: (W x D x H)	8.25 x 11.5 x 8.25 in. 21 x 29 x 21 cm
Weight:	18lb. (8kg)
Electrical:	115V or 230V, 50-60Hz, 500W
Warranty:	2 Years

- **Intuitive touchscreen control**
- **Program wizard for quick & easy protocol entry**
- **Fast, reliable results**
- **Fully adjustable heated lid**
- **Full sized model with gradient option**
- **Mini version for low throughput labs**

Touchscreen control

Fast, reliable cycling and ease of use make the Benchmark thermal cyclers the ideal choice for medium to high throughput laboratories as well as teaching facilities or those looking for a personal sized cycler.

Both the full-sized TC-9639 and mini TC-32 feature large, full color touchscreens with icon driven menus. A program wizard guides users through quick and easy entry of protocols with on board storage for over 100 typical programs. The TC-9639 has been upgraded with a gradient option for quick optimization or protocols.

The unique format of the block in the TC-9639 accepts 0.2ml tubes, strips and PCR plates as well as 0.5ml tubes. Wells in the block of the TC-32 are arranged in a 4x8 format compatible with 0.2ml tubes or strips. The blocks have a low thermal mass, allowing for exceptionally fast heating and cooling. This process is tightly controlled to maintain precision, accuracy, and uniformity both in the block and the samples. Heated lids maintain reactant concentrations. The height of the heated platen in the lid of the TC-9639 can be adjusted to fit snugly against the tops of tubes and plates.
While the TC-32 has a smaller footprint and lower capacity than the TC-9639, it still maintains many of the same programming features including time and temperature increments/decrements, auto pause, auto restart after a power failure and the ability of maintain samples at 4°C after a run.

Unique block format (TC-9639)

Technical Data:

Capacity, TC-32 Mini:	**32 x 0.2ml or 4 PCR Strips**
Capacity, TC-9639 Multiformat Block:	**96 x 0.2ml tubes/strip tubes or 39 x 0.5ml tubes or 1 nonskirted 96 well plate**
384 Well Block:	**1 x 384 well plate (TC-9639 only)**
In-situ Adapter:	**4 slides (fits multiformat block)**
Temp. Control Range:	**0° to 100°C**
Temperature Control:	**Simulated sample or block**
Accuracy/Uniformity:	**±0.2°C/±0.2°C (TC-9639) ±0.25°C/±0.25°C (TC-32)**
Max. Ramp Rate: (Heat/Cool):	**5°C per sec. / 4°C per sec.**
Lid Temperature:	**30° to 112°C, user adjustable**
Gradient Range/Differential:	**30°-105°C left to right/ 1°-30°C (TC-9639)**
Program Memory:	**Up to 100 programs** (TC-9639 offers unlimited storage with a USB flash drive)

CoolCube™ Microtube and PCR Plate Cooler

CoolCube™

- **Maintains 0°C for 4 hours**
- **Ideal for:**
  1.5ml & 2.0ml microtubes
  0.2ml PCR tubes & strips
  96 well PCR plates
- **Also for use as a PCR workstation**

The CoolCube™ is designed to keep samples cold on the lab bench without the mess of a melting ice bucket. Simply place the CoolCube in a freezer overnight and it's ready for use, keeping samples cold, but not frozen. Maintains temperature at approximately 0° C for up to four hours.

Technical Data:

Temperature:	0°C for up to 4 hours
Capacity:	
Top Side:	36 x 1.5/2.0ml tubes
Bottom Side:	96 x 0.2ml tubes
12 x 0.2ml strips
1 x 96 well PCR plate
10x 1.5/2.0ml
Dimensions: (W x D x H)	5.6x5.6x2.5 in.
14.3 x 14.3x 6.4 cm
Weight:	2 lbs (1 kg)
Warranty:	2 Years

Protease/Endonuclease:	None detected
Storage Conditions:	Room temperature

Agarose LE: General purpose agarose, suitable for a range of applications and separations of DNA fragments from 150bp to 25kb.

Agarose LM: Ideal for DNA recovery after electrophoresis and for separations of fragments from 200bp to 25kb.

Agarose HR: Best choice for resolving small fragments from 20bp to 800bp.

Agarose 3:1: This blend of LE and Hi-Res agarose is designed of resolving fragments less than 1000bp.

EZ Pack™ Agarose Tablets (0.5g)

Accuris™ Classic **Analytical Balances**

+ **Readable to 0.0001g (0.1 mg)**

+ **Available with Quick-Cal™ internal calibration option**

+ **Multiple program options (standard weighing, count mode & percent)**

Accuris Analytical Balances provide accuracy and precision for the most demanding research applications. Two capacity options are available, each incorporating a highly precise, electromagnetic force restoration sensor to deliver unsurpassed accuracy & readability to 0.0001g (0.1mg). Although all models incorporate in-lab calibration firmware, they are also available with a unique Quick-Cal™ function (Items: W3100A-120 & W3100A-210) that provides fast, reliable internal calibration with the push of a button.

Accuris™ Series **Dx & Tx Analytical Balances**
+ **Readable to 0.01mg (W3002A-120)**

+ **Quick-Cal™ internal calibration**

+ **RS232 port for printer connection**

+ **Available with full color touch screen (series TX)**

The Series Dx and Tx analytical balances are the most advanced in the Accuris line with a precisely engineered Electromagnetic Force Restoration (EFR) weigh cell to accurately determine masses to sub milligram levels. Both series include internal calibration, ensuring that the balance is always calibrated and ready for use. Auto calibration can also be set to occur at specific time intervals depending on user preference. The Tx Series features a large, high resolution touch screen presenting the user with an icon-based menu system and allowing quick and intuitive access to a wide range of useful functions.

ACCURIS

Compact

Precision

CE

Variable capacitance technology offers reliability, precision and fast stabilization

- **Large, user-friendly interface**
- **Easy, in-lab calibration**
- **RS232 port for data output and printing**
- **Multiple program options**
  (standard weighing, count mode, percent, etc.)

Accuris **Compact** and **Precision** balances quickly and accurately display sample mass measurements on a large, backlit LCD control panel. Utilizing a highly precise, gold plated ceramic capacitance sensor, these balances can provide reliable measurements to 0.001 grams (Precision models). All models feature multiple program options for standard weighing, count (or pieces) mode, as well as percent calculation.   In addition, each balance incorporates firmware for easy and reliable, in-lab calibration.

The economical **Compact** balances are ideal for a wide range of ***general weighing*** applications. They are available with a readability of 0.01g or 0.1g. Six models cover a range of up to 10,000 grams.   With enhanced shock resistance and overload protection, the **Compact** series is ideal for general purpose weighing at medium precision, in varying environments.

The **Precision** series balances are designed for more critical laboratory applications. Engineered for true ***research grade*** weighing capabilities, these balances offer higher levels of precision and readability (0.01g and 0.001g). They are useful for any laboratory application that does not require a dedicated analytical balance with sub-milligram readability. Advanced software ensures error-free weighing for various applications, including count weighing, percent calculation and inspection mode.

- **Super compact, less than 3" wide**
- **Easy to read, backlit LCD**
- **Calibration function**
- **Includes two AAA batteries**
- **Snap on, protective cover**

Accuris Mini Balances are extraordinarily compact, easy to use, and convenient for a variety of laboratory weighing applications. With a footprint of only 2.6 x 3.9 inches, they offer exceptional accuracy and linearity through their full range.

Available with a 100g or 500g capacity, these balances feature an easy to read, backlit, digital liquid crystal display and an in-lab calibration function (weights sold separately). ON/OFF, MODE & TARE buttons are easily accessed.

Powered by 2 AAA batteries (included), power shuts off after 1 minute of sitting idle to conserve battery life. Ideal for lab or field use, each balance includes a snap on, protective cover with convenient, printed instructions.

Optional in-lab calibration weights

Protective cover, included

Accuris™ **Calibration Weights**

- **Various individual and weight sets available**
- **Choose E2, F1, or M1 OIML class**
- **Includes Certificate of Verification**

Accuris calibration weights are ideal for routine calibration of your Accuris (or any brand) lab balance. Single weights as well as complete weight sets are available in various tolerance classes: OIML class E2, F1, and M1.

M1 Class: Ideal for basic (compact) 0.1 to 0.01g readability balances
F1 Class: Suitable for precision 0.01 to 0.001g readability balances
E2 Class: Recommended for analytical 0.0001g readability balances

Individual weights come in a protective case. Weight sets include a protective carrying case with foam liner. All weights are supplied with a certificate of verification.

SmartReader™ 96 is a welcome addition to laboratories routinely measuring concentration or absorbance in 96 well plates. A stand alone system, the reader features a seven inch color touch screen, multispeed shaker, intuitive software and graphical interface - no computer connections or additional software are needed.

Four popular filters are preinstalled: 405, 450, 492 and 630nm. Twenty six additional filters are available to cover the range from 340 to 750nm. Eight filters can be loaded at one time in the integrated filter wheel and selected during programming. Operation and programming are intuitive and achieved using the touch screen or optional mouse. Menus allow the user to choose the filter, set shaking parameters and enter details of the plate layout and choose details for the reading protocol and data calculations. Immediately after reading a plate, the measured data is available on the screen, as are calculations, curve fitting and data interpretation.

The USB port can be used for firmware updates as well as data transfer and printing.

2% agarose gel, 1X TAE, 5µl ladder/lane

QuickSilver™ Powdered **Buffers**

Quick SILVER™
Powdered Buffer Packs

- **Premeasured pouches with quick dissolving powder**
- **Makes 1L of ready to use 1X solution**
- **No pH adjustment needed**
- **Economical shipping with long shelf life**
- **Guaranteed quality and consistency batch to batch**

QuickSilver powdered buffer packs offer the convenience of quickly making a 1X working solution, eliminating weighing of chemicals and diluting stock solutions. Each precisely measured pouch of quick dissolving granules makes 1 liter of ready to use buffer. No pH adjustment is necessary. Tubular pouches have a tear off end and are supplied in easy access dispenser boxes. Buffers are tested to be free of DNase, RNase and protease activity. Quality and consistency are guaranteed.

Convient, premeasured packs

Just add pouch contents to water and stir to dissolve

Supplied with preprinted bottle labels

MYGEL™ mini

+ **Complete system**
  (Includes gel tank, power supply & casting accessories)

+ **Quick and easy gel casting**
  (No spacers or clamps required)
+ **Compact design, 7.5 x 5 in. footprint**

CE

The Accuris myGel Mini Electrophoresis System includes all the equipment you need to get up and running - gel tank, power supply and 2 complete casting sets. Ideal for personal use, small laboratories, or the classroom, this gel box/power supply combination is compact and easy to use.

The myGel Mini power supply attaches directly to the gel box for a secure connection every time. Selectable parameters include 3 preset voltages - 35, 50 and 100V - and a 99 minute timer. Parameters are set using the membrane keypad. The safety lid is vented to dissipate heat generated during electrophoresis, and features a viewing area above the gel. Current will only run through the system when the lid is properly in place on top of the gel box.

Trays and casting stands for both 10.5 x 6 cm and 5 x 6 cm gels are included with the myGel Mini system, as are double sided combs. The smaller tooth combs are compatible with multichannel pipettes. An optional casting set is available for 10.5 x 10cm gels. Casting is quick and easy - just place the tray in the casting stand and pour. The gel trays feature a dark contrast strip to help visualize wells while loading, and lines that fluoresce under UV and blue light to track the progress of the run.

myGel Mini power supply connects to the gel box directly, without cables or leads

Included:
E1101-CS1
Two 10.5 x 6cm gel trays

Included:
E1101-CS2
Four 5 x 6cm gel trays

Comb Dimensions (E1101-COMB1)

Large teeth: 5.65x1mm, well volume 22.6µl for 0.5mm thick gel
Small teeth: 3x1mm, well volume 12µl for 0.5cm thick gel
3mm wide teeth taper from 2mm to 1mm at tip

Ordering Information:

Item No.	Description:
E1101*	**MyGel™ Mini Electrophoresis System, complete with E1101-CS1 and E1101-CS2, 115V**
myGel Mini includes all of the below casting accessories:	
E1101-CS1	Extra casting set, for 10.5 x 6cm gels, includes two trays and two combs (22+/12 teeth)
E1101-COMB1	Extra double sided combs, 22+/12 teeth, for E1101-CS1 and E1200-CS1 casting sets, pk 2 (multi-channel compatible)
E1101-CS2	Extra casting set, for 5 x 6cm gels, includes four trays and two combs (18+/10 teeth)
E1101-COMB2	Extra double sided combs, 18+/10 teeth, for E1101-CS2 casting set, pk 2 (multi-channel compatible)
Additional casting set available:	
E1200-CS1	Casting set for 10.5 x 10cm gels, includes one tray and 2 combs (22+/12 teeth)

+Multi-channel compatible
*115V with US plug. For 230V (EU plug and step down transformer), add (-E).

Dimensions: (W x D x H)	**7.5 x 5.1 x 2.1 in. 19 x 13x 5.5 cm**
Weight:	**1 lbs (.45kg)**
Electrical:	**115V, 60Hz or 230V, 50Hz**
Warranty:	**2 years**

myGel™ Mini InstaView™ **Electrophoresis System**
- **Complete system to run, visualize *and* document mini gels**
- **Includes direct connect power supply, gel tank w/orange filter cover, casting set, blue light LED illuminator and smart phone imaging enclosure**
- **View DNA migration and separation at any time during a run**
- **Capture high resolution smart phone images without removing the gel from the tank**

C E

The new Accuris myGel Mini InstaView Electrophoresis System is a revolutionary product that allows viewing DNA separation as it happens. No longer is it necessary to stop your electrophoresis, remove the gel, and place it on a transilluminator to check the progress of the run.

The system's gel running tank is designed with a clear bottom and shaped to mate with the included LED transilluminator. The transilluminator's bright 465nm wavelength provides optimal excitation for common green fluorescent DNA stains (such as Accuris SmartGlow™, SYBR™ Green, Gel Green, and many others). The safety cover with orange viewing filter fits onto the top of the tank, and the recessed filter contacts the top surface of the buffer. This eliminates the possibility of fogging, and allows clear visualization of stained DNA as is migrates and separates. Results can be documented with a smart phone camera using the included imaging enclosure.

Ordering Information:

Item No.	Description:
E1201*	**MyGel™ Mini InstaView™ Electrophoresis System, complete with gel tank, power supply, E1200-CS1 casting set, blue LED transilluminator and imaging enclosure, 115V**
E1200-CS1	Extra casting set, for10.5x10cm gels, includes casting stand, gel tray and 2 double sided combs, (22⁺/12 teeth)

myVolt™ Touch **Power Supply**

Dual Orientation, Auto-Rotating Display

- ✛ **Touchscreen control**
- ✛ **Dual orientation, auto-rotating display (fits anywhere in a crowded lab)**
- ✛ **Intuitive programming**
- ✛ **Control voltage amperage and run time**

CE

The Accuris myVolt Touch is a work horse electrophoresis power supply that includes all of the performance and specifications needed for efficient separation of nucleic acids and proteins. The perfect companion for both horizontal and vertical gel tanks, the myVolt Touch incorporates some very unique user-friendly features:

***Touch-screen* Control Panel:** Setting up an electrophoresis run with the myVolt Touch couldn't be easier... adjust voltage, current and time values, then touch "Start" to begin the run. Voltage, current and run time are all displayed.

Technical Data:

Output Settings:	Constant voltage or constant current
Voltage Output:	10 - 300V (5V increments)
Current Output:	5 - 400mA (5mA increments)
Max Wattage:	100W
Timer:	1 min. to 20 hours or continuous
Output Terminals:	4 pairs (wired in parallel)
Safety:	No load, short circuit, overload detection, over power detection
Display: (W x D x H)	2 x 2in. touchscreen LCD
Dimensions:	8.5 x 6.3 x 4.0in. / 21.5 x 15.5 x 9.75 cm
Weight:	2lbs (0.9kg)
Electrical:	115V, 60Hz or 230V, 50Hz
Warranty:	2 years

Dual Orientation, Auto-Rotating Display: The myVolt Touch packs plenty of power and features into a compact housing. But for those crowded lab benches, we've taken our design a step further. The myVolt can be oriented horizontally or vertically to fit the space available either on the lab bench or a shelf. When the power supply is tilted up vertically or back down horizontally, the display automatically rotates. Folding feet can be extended when the power supply is horizontal for convenient access and viewing of the touch screen. When set vertically, the touchscreen is also tilted up toward the user.

Ordering Information:

Item No.	Description:
E2300*	myVolt™ Touch Power Supply, 1 to 300V max, 400mA, 100W
